Explanatory Notes

Introduction

This report presents an analysis of permanent departures from Australia. Statistics of persons departing from and arriving in Australia are based on information from Incoming and Outgoing Passenger cards supplied by passengers to the Department of Immigration and Citizenship (DIAC) on arrival in and departure from Australia and supplemented from passenger and visa information systems.

Definitions

- Permanent Departures* Residents departing permanently.
- Settlers/Permanent Arrivals* Persons arriving in Australia who hold migrant visas, regardless of stated intended period of stay, New Zealand citizens who indicate an intention to settle, and those who are otherwise eligible to settle (eg. overseas-born children of Australian citizens).
- long term movement* - temporary visa holders arriving and residents departing temporarily with the intention to stay in Australia or abroad for twelve months or more, and the departure of temporary visa holders and the return of residents who had stayed in Australia or abroad for twelve months or more;

Occupation

This data item describes a traveller's stated usual occupation prior to arrival in Australia and does not necessarily reflect occupation in Australia.

Statistics showing settler arrivals by occupation have been classified using the *Australian Standard Classification of Occupations (ASCO) Second Edition*, which has replaced the First Edition from 1 July 1997.

In the Second Edition, the number of major groups has increased from eight to nine. Because of this, comparisons between current and previous time periods cannot be shown.

The major groups are:

- Managers and Administrators
- Professionals
- Associate Professionals
- Tradespersons and Related Workers
- Advanced Clerical and Service (Workers)
- Intermediate Clerical, Sales and Service
- Intermediate Production and Transport

- Elementary Clerical, Sales and Service
- Labourers and Related Workers

The tables in this publication include a number of categories which are not strictly 'occupation groups'; for example *Not in Employment*, *Not in the Labour Force*, and *Not Stated*. *Not in Employment* refers to persons who have stated that they have been unemployed without providing an adequate occupation description. *Not in the Labour Force* includes children, persons stating 'home duties' as their occupation, students and retired persons. *Not Stated* refers to those persons whose occupation description is not sufficiently specific to enable the allocation of precise ASCO codes.

For further information about ASCO, and for copies of the classification, please contact the Australian Bureau of Statistics.

Classification of Countries and Regions

Statistics in this publication are classified to regions and countries based on the ABS *Standard Australian Classification of Countries (SACC)*. The classification is based on the concept of geographic proximity. It groups neighbouring countries into broad geographic areas on the basis of their similarity in terms of social, cultural, economic and political characteristics.

The country classification used in this report is listed on page 54. In the tables in this publication some minor groups have been combined due to space limitations. For further information about SACC and for copies of the classification please contact the ABS.

Australia and External Territories

Following amendments to Section 17(a) of the Acts Interpretation Act 1901 - 1973 effective 1 July 1992, the territories of Christmas Island and Cocos (Keeling) Islands now form part of geographic Australia. The Jervis Bay Territory has always been a territory in its own right, and following self-government for the ACT it is no longer included with the ACT for statistical purposes. These three territories are classified as the ninth state/territory of Australia.

Australian External Territories comprises the statistical units of Norfolk Island and Other Australian External Territories.

Former Yugoslavia

Separate data for the federation of Serbia and Montenegro has been available since July 1998, Montenegro declared its independence on the third of June 2006. Prior to July 1998 the *Former Yugoslavia nfd* component was a substantial proportion of total Former Yugoslavia. Consequently the separate figures for the individual countries were likely to be significantly understated.

Former USSR and the Baltic States

Because, *Former USSR and the Baltic States nfd* accounts for a high proportion of total Former USSR and the Baltic States, the separate figures for component countries are likely to be understated and should be used with caution.

Ethiopia and Eritrea

Caution is also required when using data for Ethiopia. This figure may include arrivals born in Eritrea since settlers who reported Ethiopia as their country of birth were coded as such, despite the fact that they may have been born in what is now called Eritrea.

Additional Data

The Research and Statistics Section offers a range of tables not published in this report, upon request. Statistics on settler arrivals can be cross-tabulated with the following data items:

- Country of Birth
- Country of Citizenship
- Country of Last Residence
- State/Territory of Intended Residence
- Sex
- Age
- Migration Category
- Occupation
- Applicant Type (Primary, Secondary)

More complex requests for data and requests for multiple years of data do incur a charge.
